NOTICE

PLEASE EXCUSE THIS INCONVENIENCE

TEMPORARY WATER SHUT-OFF

The water main that serves your residence must be shut-off to allow for the safe repair of a leaking water service to #120 Topsfield Road. This notice only affects residents on Topsfield Road from #97 Topsfield Road to Cherry Street. Please draw enough water to supply your needs during this period.

WATER WILL BE SHUT-OFF on **Wednesday, June 8, 2016 @ 9am**, the water main will be shut down for approximately 4 to 6 hours. Residents are encouraged to close a valve at their water meter during the water shut down. This should help prevent a complete loss of water in the building. Occasionally, some problems occur after the water supply is reinstated. If water shows discoloration, run the water until it clears through an outside spigot. If water is available from most faucets, but won't flow from a particular one, remove the screen from that faucet and run water. Clean the faucet screen and reinstall it. If you have any concerns regarding the water service interruption, please contact **Erik Mansfield at (978)468-5520 x6**.
